The IDEA Framework in action: sector examples

Contactless Service and Operations was developed to provide a framework for reevaluating an organization's key customer and employee journeys and interactions in light of COVID-19. It focuses on making those journeys and interactions better not just safer.

The goal of the **IDEA Framework** is to help organizations reimagine mission-critical priorities, investments, and operations while providing the "human" elements related to service.

This document provides a sector specific example on how the process of the **IDEA Framework** could be applied.

If you would like to view additional details of this approach please click here ([link](#) to CxO)

Organizations should follow local regulations and country-specific circumstances before implementation of specific interventions.

This content consists of insights from McKinsey's operations and design practice and is provided "as is" solely for informational purposes. It does not constitute or is intended to be legal or safety advice. Organizations should consider all applicable laws, standards, and country-specific circumstances before adopting any measures. Organizations should engage their own legal counsel and safety experts to ensure compliance.

The IDEA framework provides a process that can help identify human-centered solutions for evolving business scenarios

Identify interactions & areas of concern

Identify the types of work environment relevant to the business

Identify types of in-person interactions for priority journeys within three main buckets:

- Employee to employee
- Employee to customer
- Customer to customer

Diagnose & prioritize areas of concern

Prioritize areas of concern using multiple lenses:

- Type of interactions
- Evolution of customer and employee experience
- Implications on operations and cost

Develop & Execute solutions

Develop and roadmap solutions across three horizons:

- Immediate needs to continue or re-start critical operations
- Re-prioritizing and accelerating key initiatives
- Investment in distinctive long-term solutions

Adapt & sustain

Operationalize solutions across the organization, iterating and adjusting to meet the needs of the evolving situation

Empower teams to stay ahead of emerging situations and bring learning back to the organization

The first step of the IDEA framework is to identify interactions and areas of concern across key journeys and interactions

ILLUSTRATIVE EXAMPLE

NONEXHAUSTIVE

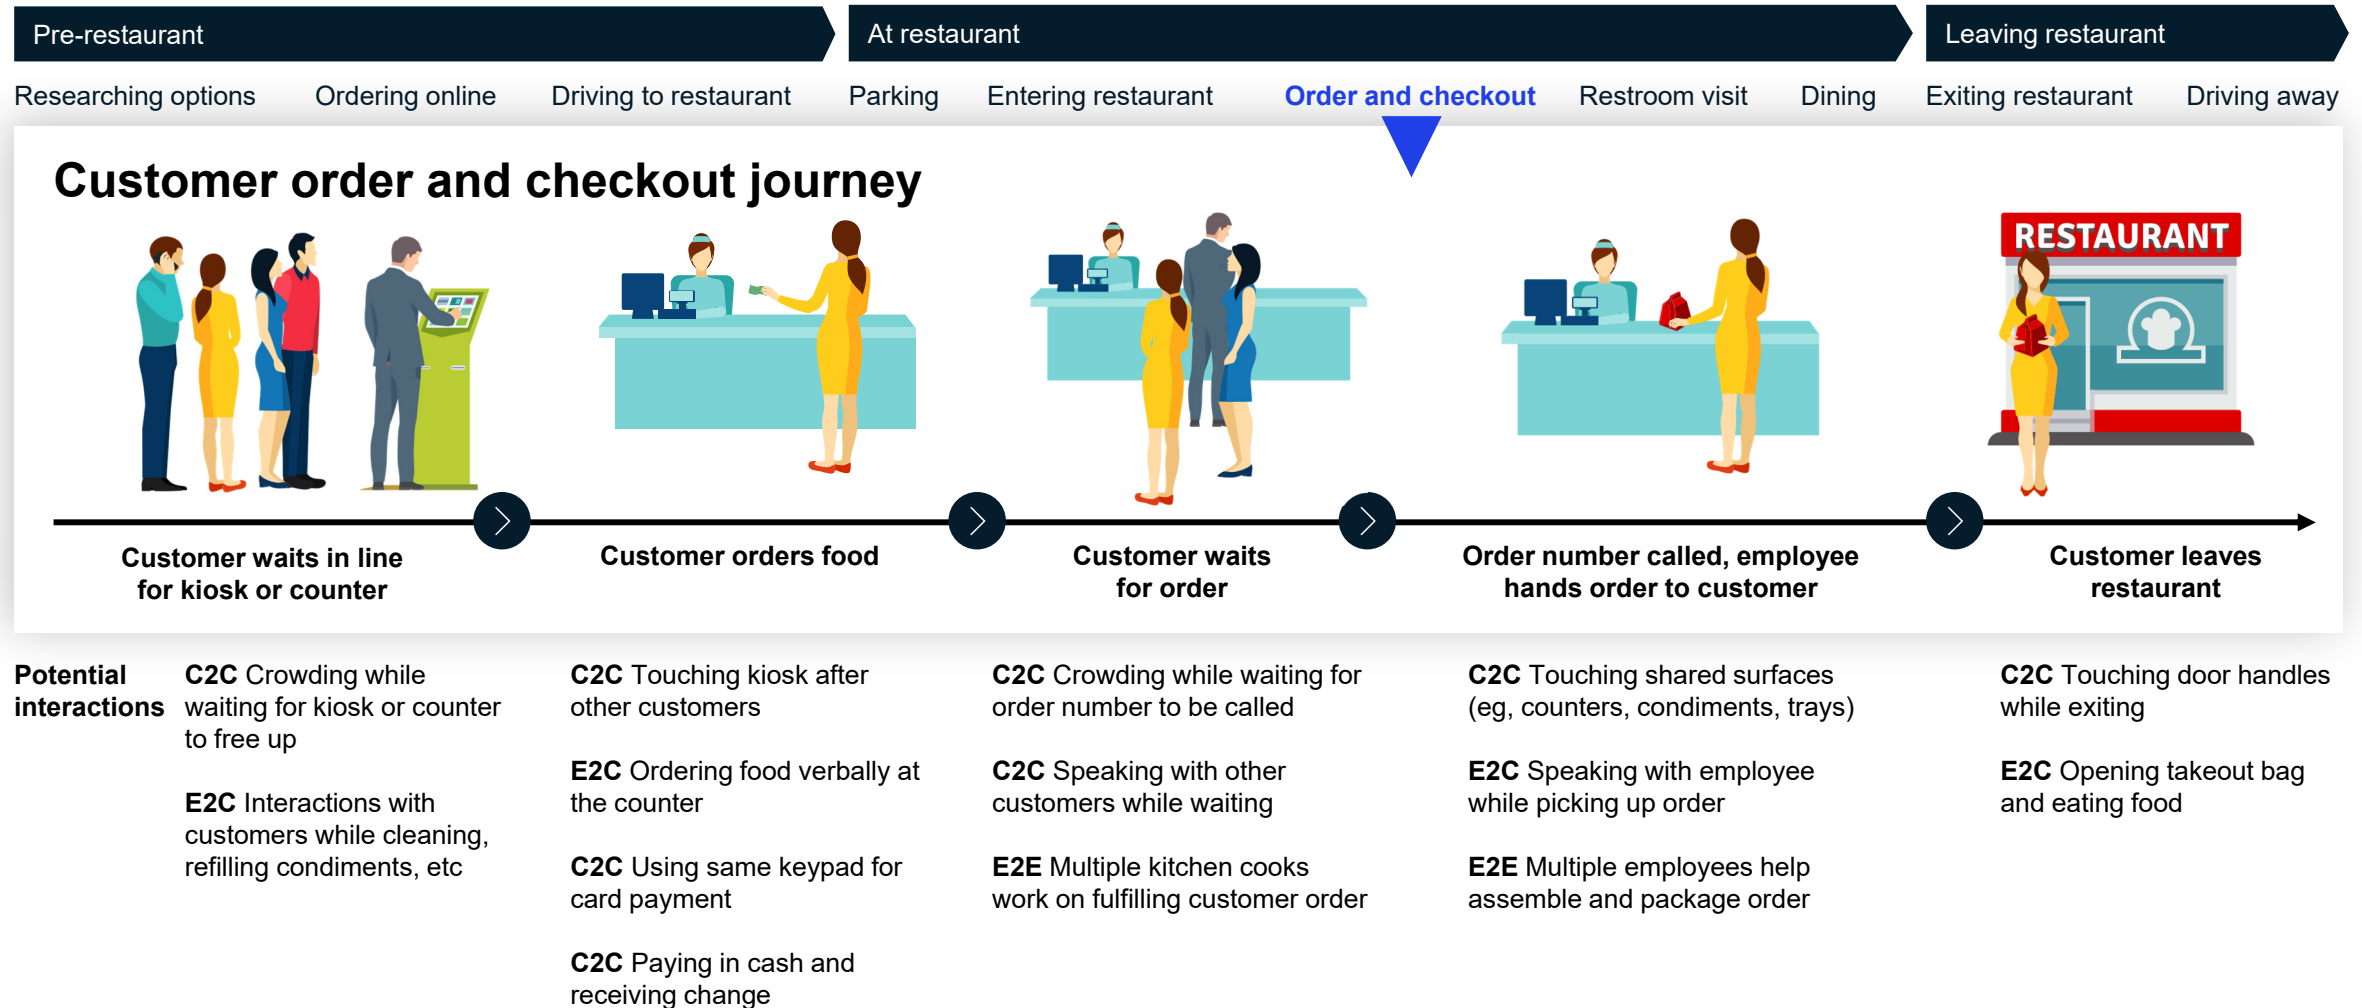

Detailed areas per type of interaction and operation

		 Goods transfer	 Services	 Internal tasks/processes
Interaction types	 Employee to employee	Food and beverage passed between employees End-of-day money counts Cash taken to safe or off-premise	Taking food orders Cooking in close proximity	Restocking supplies and amenities Punching in and out Sharing cleaning supplies (mops, buckets, spray bottles, etc) Work breaks
	 Employee to customer	Employees passing orders, including food and trays Customers paying with cash	Handing food to customers Customers handing over credit card Taking orders at the drive-through Employees cleaning up used trays Touching shared counter during ordering and transaction Resolving client complaints	Taking out the trash and cleaning Touching doors when opening and closing the restaurant Giving printed receipts to customers
	 Customer to customer	Multiple customers using tables, chairs, trays, drink-filling stations	Multiple customers waiting in line to order Restroom surfaces Customers ordering with touch-screens	Air circulation in dining area Customers touching doors when entering/exiting Customers signing for receipts

Once identified, organizations are advised to diagnose and prioritize areas of concern

ILLUSTRATIVE EXAMPLE

E2E: Employee to employee E2C: Employee to customer C2C: Customer to customer

Companies can seek to develop and execute solutions to help improve safety and experience across key business elements

ILLUSTRATIVE EXAMPLE

NONEXHAUSTIVE

Potential levers that could be utilized in solutions

New offers & services

Policies

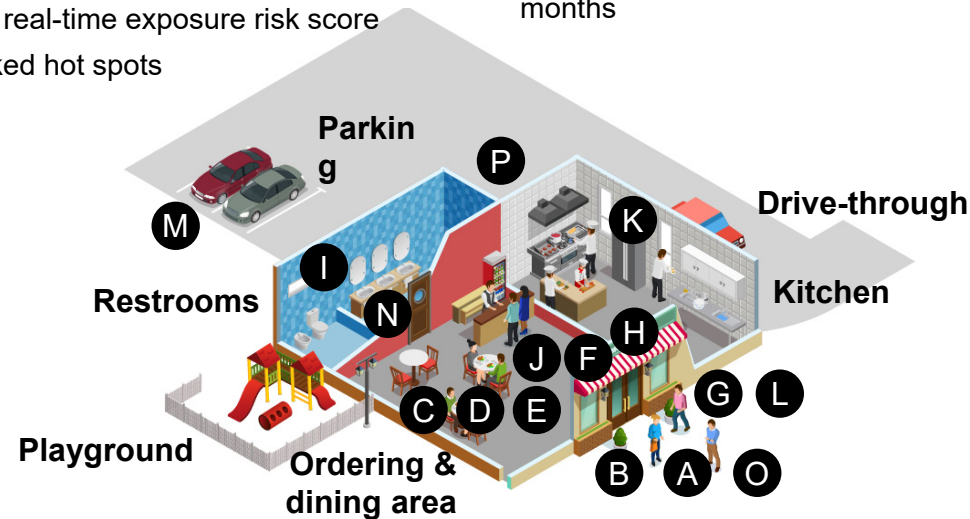

Processes

Digitization

Innovations and improvements could address guest and associate safety and comfort in and around the restaurant

- | | |
|---|--|
| A Temperature measurement on entry | J Signage elements and/or ticketing system to avoid crowding when ordering inside |
| B Remodeled movement flows including one-way entries and exits | K Upgraded PPE at kitchen and counter |
| C Increased table spacing | L Restaurant's protective measures communicated on food delivery apps |
| D Limitation of customer density throughout day | M Curbside order pickup |
| E Communication of guidelines to customers | N More touch-free interfaces |
| F Contactless ordering | O Sanitizer or wipes at exit |
| G Dedicated hours and dining areas for at-risk populations | P Greater use of outdoor areas during warmer months |
| H Display with real-time exposure risk score | |
| I Clearly marked hot spots | |

Potential additional examples

- C** Increased table spacing

- I** Clearly marked hot spots

- N** More touch-free interfaces

The last step to consider is to pilot, adapt, and scale solutions as appropriate, keeping employee and customer experience in mind
