

# Contactless service and operations: Department of Motor Vehicles

Improving and enabling human-oriented service  
and operations in response to COVID-19

# The IDEA Framework in action: sector examples

---

**Contactless Service and Operations** was developed to provide a framework for reevaluating an organization's key customer and employee journeys and interactions in light of COVID-19. It focuses on making those journeys and interactions better not just safer.

The goal of the **IDEA Framework** is to help organizations reimagine mission-critical priorities, investments, and operations while providing the "human" elements related to service.

This document provides a sector specific example on how the process of the **IDEA Framework** could be applied.

If you would like to view additional details of this approach please click here ([link](#) to CxO)

Organizations should follow local regulations and country-specific circumstances before implementation of specific interventions.

This content consists of insights from McKinsey's operations and design practice and is provided "as is" solely for informational purposes. It does not constitute or is intended to be legal or safety advice. Organizations should consider all applicable laws, standards, and country-specific circumstances before adopting any measures. Organizations should engage their own legal counsel and safety experts to ensure compliance.

# The IDEA framework provides a process that can help identify human-centered solutions for evolving business scenarios

---

## Identify interactions & areas of concern

### Identify the types of work environment relevant to the business

Identify types of in-person interactions for priority journeys within three main buckets:

- Employee to employee
- Employee to customer
- Customer to customer

## Diagnose & prioritize areas of concern

### Prioritize areas of concern using multiple lenses:

- Type of interactions
- Evolution of customer and employee experience
- Implications on operations and cost

## Develop & Execute solutions

### Develop and roadmap solutions across three horizons:

- Immediate needs to continue or re-start critical operations
- Re-prioritizing and accelerating key initiatives
- Investment in distinctive long-term solutions

## Adapt & sustain

**Operationalize solutions across the organization,** iterating and adjusting to meet the needs of the evolving situation

**Empower teams to stay ahead of emerging situations** and bring learning back to the organization

# The first step of the IDEA framework is to identify interactions and areas of concern across key journeys and interactions

E2E: Employee to employee

E2C: Employee to customer

C2C: Customer to customer

|                        |                                                     |                                                        |                                                      |                                                                |                                                              |
|------------------------|-----------------------------------------------------|--------------------------------------------------------|------------------------------------------------------|----------------------------------------------------------------|--------------------------------------------------------------|
| Potential interactions | C2C Waiting in line with other customers            | E2E Sharing the same office space with other employees | E2E Using shared office equipment and supplies       | E2C Using office's terminal for testing and photo              | E2C Exchanging application materials (receipt, ID, etc)      |
|                        | E2C Entering application information on a kiosk     | E2C Speaking with customer across counter              | E2C Handling client's ID, documents, and other items | C2C Walking to or waiting in a different section in the office | E2C Taking phone or wallet out to make payment               |
|                        | E2C Exchanging application materials at the counter | E2C Exchanging application materials with customers    | C2C Touching counters, brochures, and other surfaces | C2C Touching same items and office supplies                    | C3C Sharing the thumbpad or card reader with other customers |

# Companies can seek to develop and execute solutions to help improve safety and experience across key business elements

## ILLUSTRATIVE EXAMPLE

## NONEXHAUSTIVE

### Potential levers that could be utilized in solutions

#### New offers & services

#### Policies

#### Processes

#### Digitization

### Innovations and improvements could address guest and associate safety and comfort in and around the DMV

A

Hot spot surfaces marked with color

B

Contactless authentication methods like facial recognition

C

Re-designed low-touch spaces and interfaces

D

Physically distancing office arrangements and flows

E

Completely digital application (ie, scanning personal documents, online application)

Start station

Testing station

Back office

Rep windows

Waiting area

Queue for triage

### Potential additional examples

- F Remodeled movement flows
- G Upgraded PPE for employees and customers
- H Improved air filtration and ventilation systems
- I Hygiene zones for employees
- J Worker proximity sensors in office and counter area
- K Scheduled regular disinfection
- L Limitation on the number of customers in the office
- M Sanitation of keypads, autorefractor after each use
- N Greater use of clear barriers (ie, plexiglass) between employees/customers

# The last step to consider is to pilot, adapt, and scale solutions as appropriate, keeping employee and customer experience in mind

## ILLUSTRATIVE FUTURE STATE JOURNEY EXAMPLE

## POTENTIAL ACTIONS TO CONSIDER
