Overview

McKinsey & Company is a global management consulting firm, deeply committed to helping institutions in the private, public, and social sectors achieve lasting success. For more than 90 years, our primary objective has been to serve as our clients' most trusted external advisor. With consultants in 129 cities in 65 countries, across industries and functions, we bring unparalleled expertise to clients anywhere in the world. We work closely with teams at all levels of an organization to shape winning strategies, mobilize for change, build capabilities, and drive successful execution.

Our clients

Our commitment to our clients and the impact we jointly bring about is the fundamental value of our firm. We bring the best of our global firm, working in an integrated way across regions, sectors, and disciplines to ensure our clients improve immediate performance and build long-term organizational health. Our clients have full access to all the knowledge we have built through decades of work.

Our people

The quality of our people determines how well we serve our clients and we focus tremendous resources on identifying, hiring, and developing them. We have global support networks for women, LGBTQ, Hispanic and Latino, and black consultants.

Our knowledge development

We invest more than \$600 million of our firm's resources annually in capability building and knowledge development, which allows us to bring the best thinking to our clients. We established our in-house think tank, McKinsey Global Institute, in 1990, to develop research on major challenges and trends changing the world.
