What is good digital ID?

Good digital ID is an identification that is verified and authenticated to a high degree of assurance over digital channels, unique, established with individual consent, and protects user privacy and ensures control over personal data.

Facilitating interaction between individuals and institutions

Digital ID facilitates 6 types of interactions between individuals and institutions.

Unlocking global economic value

Across our focus countries, digital ID could unlock economic value equivalent of between 3%–13% of GDP in 2030.

Potential for misuse and possible risk elements

While digital ID can reduce risks associated with conventional ID programs, such as manual error, it could be...
